PROFESSIONAL SUMMARY

Aspiring Java Full Stack Developer with a strong foundation in Java, HTML, CSS, JavaScript, and MySQL. Currently expanding expertise in MERN Stack development and modern web technologies. Passionate about building responsive, user-friendly, and efficient web applications with clean and scalable code. Eager to contribute to innovative projects, enhance technical skills, and grow as a software developer in a dynamic and results-driven organization.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Frontend Technologies:** HTML, CSS, Bootstrap, React.js
- **Backend & Databases:** Node.js, Express.js, MySQL, MongoDB
- **Tools & Platforms:** VS Code, Git, GitHub
- **Areas of Interest:** MERN Stack Development, Full Stack Web Development

PROJECTS

Craving Clone – Food Delivery Web Application

- Built a responsive food delivery web application mockup featuring interactive restaurant listings and detailed menu browsing.
- Implemented dynamic cart management features including adding, removing, and updating item quantities seamlessly.

Weather Application

- Developed a real-time weather tracking application utilizing the OpenWeather API to fetch live meteorological data based on user input.
- Designed a clean user interface to display key details like temperature, humidity, and weather conditions dynamically.

Task Management App

- Created a structural To-Do list application enabling users to efficiently perform task creation, tracking, and status updates.

Core Utility Applications (Currency Converter / Calculators)

- **Currency Converter:** Built a multi-currency conversion utility integrating live exchange rates API data.
- **Salary & Age Calculators:** Programmed functional utility tools with robust form input validation mechanisms.
